## Wheels, Brakes & Parts

Cleveland, Goodyear, Goodrich, McCauley, Bendix, and other wheels, brakes and parts for antique through late corporate aircraft, including Scott, Maule and other tailwheel parts.

## Brake Service | Goodyear Auto Service

Shaking may be caused by an out-of-round brake rotor or brake drum, which you might feel through the brake pedal. Another contributing factor could be a sticking brake caliper with worn out brake hardware, in which case you would feel vibrations through the steering wheel. To learn more, check out our explanation of How Brakes Work.

## Aircraft Systems: Aircraft Brakes

While aircraft brakes slow the aircraft by changing kinetic energy into heat energy, overheating of the brakes is not desirable. Excessive heat can damage and distort brake parts weakening them to the point of failure. Protocol for brake usage is designed to prevent overheating.
