This information is provided by a service that aggregates data from review sources and other sources that are often consulted by libraries, and readers.

Nurses Counselling: The View from the Practitioners ...

The text starts with a discussion about the range and breadth of counselling in nursing. This is an important chapter and presents a critical evaluation of the problems of counselling practice and doing research. Experienced practitioners have then contributed chapters on counselling in different situations.

Viewpoint: PTSD in Nurses: On

Too often, health care professionals suffer in silence together. In order to stanch the flow of nurses from the profession, nursing schools must put more emphasis on burnout prevention. Hospitals, nursing homes, and visiting nurse services must provide confidential and effective counseling to all employees.

Challenges Facing Family Nurse Practitioners in 2017

Bernazzani went on to write, "Nearly 90% of all nurse practitioners are prepared to provide primary care, which includes preventive and chronic illness care. NPs have the advanced education and training to carry out many traditional physician tasks, including writing prescriptions.

nursing 110 final Flashcards | Quizlet

The school nurse is counseling an obese 10-year-old child. What factor would be important to consider when planning an intervention to support the child's health? A) Concentrate on the child only rather than the family since it is the child's responsibility. B) Consider the use of medications to suppress the appetite.

Evidence

Two major issues make the artificial dicotomy between research and practice not only irrelevant but also potentially harmful to the current and future status of counseling practice and preparation. First, most practitioners know that today's landscape of counseling practice is one dominated by accountability.

What's a Nurse Practitioner (NP)?

Didactic and clinical courses prepare nurses with specialized knowledge and clinical competency to practice in primary care, acute care and long-term health care settings. Qualifications To be recognized as expert health care providers and ensure the highest quality of care, NPs undergo rigorous national certification, periodic peer review, clinical outcome evaluations and adhere to a code for ethical practices.
